# Nozbe is a task and project management app

One of Nozbe users said: "It is a tool to get things organized and done." Basically, that's it. And since 2007 we've been constantly working on improving the Nozbe productivity system appreciated by over 500,000 busy people and effective teams all over the world. We offer our customers not only apps for all the popular platforms (Windows, Mac OS, Linux, Android and iOS) but also friendly support and educational materials to help them achieve success while living a more balanced and better organized life.
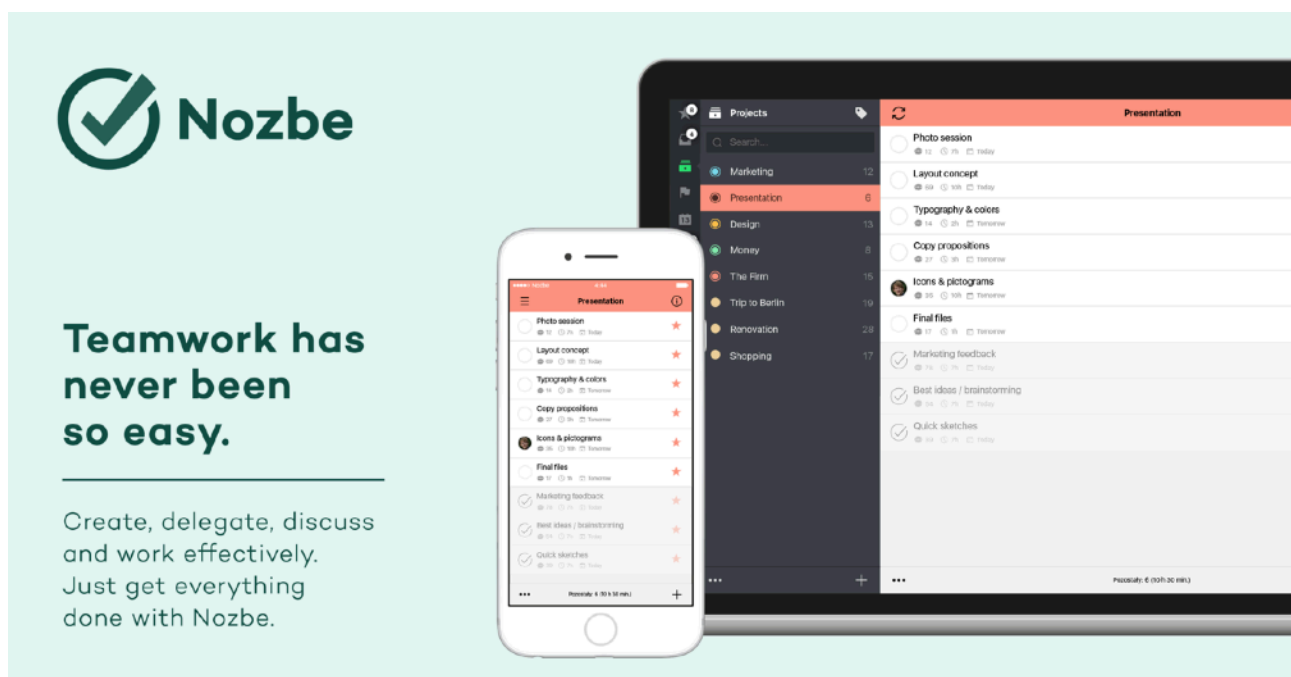

Nozbe was created in 2005

…as Michael Sliwinski's side project intended for personal purposes only. After two years he realized that his tool could help more people get organized and in 2007 he launched it as a web-based application.

From the very first day Nozbe had clients. In 2007 Michael introduced paid plans that allowed him to take on Nozbe as a full-time job in 2008. After all these years in business we're still funded by our clients, not Venture Capital companies. It's important for us to deliver the best and most useful and productivity-boosting product for people to rely on.

How we work

At Nozbe we believe that work is not a place to go but a thing we do. That's why we all work remotely and have actually no office. The Nozbe team includes 25 people (the core team) and over 10 contractors based in 35 different places all over the world. We don't use email for internal communication. We all communicate through tasks and comments in Nozbe app.

Michael Sliwinski

The CEO and founder of Nozbe, speaker, author, podcaster and blogger. He helps busy and overworked professionals, startups and teams learn to implement the latest productivity solutions so they can achieve success by getting things done better.

The Nozbe app

Thanks to Nozbe, users can:

- Create and effectively manage tasks & projects, set deadlines, categories and responsibility - all in a simple interface
- Add tasks with parameters really quickly using #hashtags
- Make email actionable - add tasks with parameters and comments via email
- Use categories and labels to batch and filter stuff and focus on what's crucial
- Cooperate: share projects and communicate through tasks with comments and attachments
- Get notified about delegated tasks, @mentions and due dates via push notifications
- Access tasks on a timeline with Nozbe Calendar (optional sync with Google Calendar)
- Use favorite tools along with Nozbe thanks to seamless integration with Evernote, Dropbox, Google Drive, Google Calendar, OneDrive and Box
- Never forget anything: tasks with deadlines automatically become priorities; recurring tasks are cool, too
- Save processes and procedures in Nozbe as project templates. Start a new project when a new instance is ready to go
- Nozbe Ratio and Productivity Reports help track, measure and "gamify" both personal and team productivity
- Nozbe is constantly evolving! We update and improve our app every 4-6 weeks

"Simple to use with advanced features: The product is at once simple to use and yet full of numerous, advanced features. It is the only task management system I feel comfortable recommending." - Michael Hyatt, bestselling author and blogger
