*Read about QTbar in the latest Smart Computing and installed it immediately after reading the review. I am VERY pleased. Don't know what I like best, the quick e-mail feature or being able to see the beautiful picture I use for wallpaper because all the shortcuts are gone! We have a home office, so the computer is heavily used, plus a teenage aspiring writer/internet user with shortcuts for literally everything. Also like the feature that lets me go just to the web sites I want to. Good job!!*

▪ **Pedro Pons**

*Great program. I use it at home and at work. Have not used it much yet but I'll give you more feedback in a while. Thanks, great product.*

**■ Dave Stone**

**■ Jacques-Philippe Saint-Gérard*****I am definitely a QTBar addicted!***

*I already used the first version, but it seemed to generate some problems with my Windows XP Professional. The new downloaded version is perfect on all my computers (one laptop with Windows Millenium, one in my office with Windows 98, the other at home with Windows XP)!*

**■ André S. Hellmich**

*Qtbar is a wonderful tool I have had to use; powerful, useful, friendly and easy to configure; your job on the development about QTbar is remarkable.*

▪ **Ron Moffatt**

*Thanks again for qtbar. The new version is excellent. I thought the old version was better than any thing else I tried (and I have tried numerous launch programs), but this new version is just plain and simply the best on the net. Installation was easy and uncomplicated. I highly recommend it to anyone looking for this type of software. Great program and really appreciated.*

*Thanks a million*

▪ **MaDMxOne - New-Dog Diversified**

*I just wanted to thank you for the update to QTbars' functions.*

*I used the older version last year on my win95 sys, after the update I have foregone use of the windows quick launch bar and replaced it by QTbar.*

*The fact that it is more configurable, and has all the added functionality (not to mention freeware) makes it a clear choice for my needs.*

▪ **Francis Brassier**

*QTbar is the best substitute I know for the internet plus bar, with added advantages.*

▪ **John M. Kleckner (Salem, Oregon - USA)**

*The QTBar is a great little program. Keep up the good work.*

▪ **Joe WS (Buffalo, New York - USA)**

*I just installed your Quick Toolbar and had to say thanks for a terrific application. I have looked at many similar apps and yours blows 'em away for functionality and ease of use. The price is right, too! ;-) Keep up the outstanding work, I'm gonna recommend this to everyone I know.*

▪ **Ron Moffatt**

*Ich suche schon lange ein solches Programm und ich habe echt viele Programme ausprobiert. Aber mit der QTBar ist euch das BESTE PROGRAMM gelungen das ich bis jetzt ausprobiert habe.*

*Das programm ist zu verstecken, übersichtlich, hat Favoriten, eigene Links, Verschiedene Programme und noch mehr, so das ich nicht weiterschreiben möchte. Jedes Wort ist überflüssig, denn was soll mann über das beste was es gibt noch sagen!*

*Also macht weiter so!  
Viel Glück und alles gute!*

*Just now downloaded QTbar and launched it: wonderful!! All programs, files and so on within reach of one click...*

*I especially like the 'GO!' - feature: option of new url or a search on the site one is visiting, also one click away...*

▪ **Marty Kjar**

*Congratulations, I have tried so many different program launchers in the past, but none have had the look and feel I was after, or else they were buggy and unreliable, or needed vb6 libraries or something else.*

*This is by far the best launcher I have used, and I congratulate you on its quality, and of course the fact that it is free.*

▪ **Tim Jones (USA)**

*I absolutely love QTbar! I've tried a number of program launchers and shell replacements and have always come away unimpressed. QTbar is a keeper!*
